

SHUBHAM SABAT

Gen AI / Agentic AI Engineer

Odisha, India | +91 81446 02975 | shubhamsabat836@gmail.com | linkedin.com/in/shubhamsabat | github.com/s1ub1am

PROFILE SUMMARY

AI Engineer at Tata Consultancy Services (TCS) specializing in GenAI, Agentic AI, and enterprise automation systems. Experienced in developing multi-agent workflows, RAG-based document intelligence systems, and AI-powered automation solutions using LangGraph, FastAPI, vector databases, and LLM APIs. Currently pursuing MCA in AI/ML while building practical enterprise AI applications for industrial use cases.

CORE SKILLS

Gen AI & Agentic AI	LLMs, Agentic AI, LangGraph, LangChain, RAG, MCP, Multi-Agent Orchestration, Agent Memory, Prompt Engineering, Tool Calling, Function Calling
Frameworks/Cloud	LlamaIndex, OpenAI APIs, Azure OpenAI Service, Docker, Kubernetes, CI/CD, MCP Server
Backend & Databases	Python, FastAPI, Django, Express, REST, Pinecone, FAISS, PostgreSQL, MongoDB, MySQL, Redis
Tools	Postman, Git, Github, Linux, Ollama, Streamlit

PROFESSIONAL EXPERIENCE

Tata Consultancy Services (TCS)

AI Engineer (Current)

- **Project: SOP Gen AI** — Designed and developed a multi-agent AI-powered SOP generation system for industrial workflow automation using LangGraph, Python
- Built a multimodal document processing pipeline capable of handling DOCX, PPTX, XLSX, images, audio, video, Markdown, and TXT inputs for structured SOP generation.
- **Technologies:** Implemented agent orchestration workflows, tool-calling pipelines, and memory-driven AI execution using LangGraph, Python, Azure services and FAST APIs.

PROJECTS

Enterprise Document Intelligence Assistant

- Engineered an AI-powered enterprise document assistant utilizing a RAG architecture for retrieving and answering complex, contextual queries from large organizational document sets.
- Developed multi-format ingestion pipelines (PDF, DOCX, TXT, Markdown) enabling intelligent semantic search using embeddings and vector databases.
- Integrated advanced LLM-based conversational querying workflows for enterprise knowledge assistance and document interaction
- **Technologies:** Python, LangChain, RAG, Vector Databases, FastAPI, Groq APIs, Ollama, FAISS

UrbanNest - Hostel and Food Subscription Booking Web app (Final year BSc)

- Developed a full-stack web application (urbannest) connecting students with verified hostel/PG/room providers and food subscription services.
- Key features implemented include room and meal plan listings and advanced filtering.
- **Technologies:** PHP, MySQL, HTML, CSS, JavaScript, Razorpay API

EDUCATION

M.C.A.(AI/ML), Chandigarh University (Pursuing)

B.Sc. Computer Science, Berhampur University (2022 – 2025)

Schooling, Odisha Adarsha Vidyalaya (2019-2022)

CERTIFICATIONS

Azure AI Engineer Associate | Azure AI Fundamentals | Azure Fundamentals
